

Gowtham Sai Bhuvanam

AI Engineer | Strategy & Execution

Tampa, FL | +1 (656) 214-9504 | gowthamsaib277@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

AI Engineer & Co-Founder with 4+ years of experience building and deploying high-impact AI, ML, and analytics solutions. Proven ability to operate at the intersection of strategy and execution by translating complex business problems into LLM-powered tools, executive dashboards, and decision-support systems used by senior leadership. Experienced in cross-functional collaboration, go-to-market strategy, and delivering measurable outcomes across fast-paced environments.

SKILLS

Generative AI & LLMs: Large Language Models (LLM), Natural Language Processing (NLP), Sentiment Analysis, Transformer based architectures, RAG, Prompt Engineering

Deep Learning Frameworks: PyTorch, TensorFlow, Keras, and CNN.

Machine Learning: XGBoost, Random Forests, SVM, Bayesian Methods, Regression Analysis, K-Means Clustering, Back Testing

Statistical Analysis: Hypothesis Testing, A/B Testing, Causal Inference, and Bayesian Inference.

Cloud Platforms: AWS (SageMaker, Lambda, EC2, S3, API Gateway), GCP (Vertex AI, BigQuery), and Azure ML.

Deployment & DevOps: Docker, Kubernetes, MLflow, CI/CD pipelines, Git, GitHub, Jenkins, Vercel.

API Integrations & Development: GPT, Claude, Gemini, FastAPI, Flask, Streamlit, React.

Languages: Python (Primary), SQL, R, SAS, TypeScript.

Big Data Technologies: PySpark, Apache Spark, Kafka, Hadoop, Hive, and Flink.

Databases: Snowflake, Databricks, MySQL, MongoDB, Postgres, Oracle, Vector Databases (Pinecone, Chroma)

Data Orchestration: LangGraph, Airflow, Apache Spark.

BI Tools: Tableau, Power BI, and Excel (Power Query, Pivot Tables).

Data Visualization: Plotly, Seaborn, Matplotlib, and Dash.

Operating Systems & Tools: Linux, Windows, Shell Scripting.

EXPERIENCE

GitaVox Inc., Tampa, FL | Co-Founder & AI Engineer

Mar 2026 - Present

- Co-founded GitaVox Inc., an AI-powered voice, text agent, and web solutions company serving B2B clients across Healthcare, Legal, Insurance, and Financial Services; personally own product, engineering, and client delivery end-to-end.
- Directed full-stack go-to-market strategy, managed product direction, B2B outreach, and customer discovery, bridging AI engineering with business strategy.
- Design and build client-facing websites and web applications using modern frameworks (React, TypeScript, Vercel), alongside LLM-powered voice agents with Twilio SIP trunking and sub-300ms response latency.
- Conducted market research and competitive analysis to shape product pricing, positioning, and sales materials, supporting go-to-market strategies for enterprise customers.

Intuit, USA | AI Engineer

Jan 2025 - Feb 2026

- Architected and scaled the GenOS platform to support 100+ production models and 20M+ monthly inferences, maintaining 250ms p95 latency and 99.9% system availability.
- Implemented hybrid search, model routing, and guardrails that improved response accuracy to 94%, reduced hallucinations by 42%, and slashed token costs by 28% in regulated financial environments
- Developed Intuit Assist AI agents using multi-agent orchestration to automate 60-70% of manual accounting workflows in QuickBooks, increasing task-completion rates by 22% for 15M+ users.
- Designed and delivered executive-facing dashboards and decision-support tools using Tableau and Power BI, enabling senior leadership to track AI model performance, product health, and operational KPIs in real time.
- Operated at the intersection of strategy and execution, translating ambiguous business problems from Finance, Product, and Design into scoped AI initiatives with measurable outcomes, reducing time-to-insight by 40% across key decision workflows.
- Partnered cross-functionally with Product, Finance, and Design teams to translate complex financial logic into explainable, user-friendly AI outputs, directly increasing customer trust scores by 18% and informing executive-level roadmap decisions.

Tata Consultancy Services, India | Data Scientist

May 2020 - August 2023

- Led the end-to-end development of ML/AI models (Random Forest, XGBoost, CNN, NLP) for credit risk and fraud detection, achieving 97% fraud detection accuracy and reducing financial exposure.
- Deployed enterprise-grade AI solutions and fine-tuned transformer models; built a multilingual customer-support chatbot with FastAPI and Streamlit that handled 1,200 daily queries, reducing average response time by 40%
- Partnered with senior stakeholders to translate analytical findings into strategic recommendations, including a campaign optimization initiative that drove a 12% lift in conversion and was adopted as a company-wide standard.

EDUCATION & CERTIFICATIONS

Masters in Artificial Intelligence and Business Analytics | University of South Florida, Tampa, FL | Aug 2023 - May 2025

Bachelor of Engineering in Computer Science & Engineering | AP IIT Srikakulam | India

Certification: SnowPro Associate Certified (Snowflake)
